

The
ORION
 MX8

**Professional Dip Slide
 Incubator**

**Pre-set to 30°C as standard
 (35 or 37°C to order)**

**Economic & Convenient - Correct Incubation Compliance
 Designed specifically for the Environmental and Engineering Industry –
 simply plug in and incubate!**

The Orion MX8 is truly the first of its kind and once again sets new standards – following in the footsteps of the immensely popular GNAT MX2 model this unique incubator offers convenient incubation of 1 to 8 standard Dip-slides at a factory pre-set temperature of 30°C with other temperature options available to order if required.

As with our other Incubators the MX8 features the proven MX electronic temperature control system, fully solid state for infinite reliability in the toughest of user environments and safe 12v DC operation provided by the mains adaptor supplied.

The stylish and robust design features a tough 4mm ABS injection moulded body with a strong HIP lid so is ideal for demanding industrial applications on site. An optional 12v cigar lighter cable is available allowing the Orion MX8 to be used in a vehicle if required.

The stylish design holds up to 8 slides safely in the special wells. A clear lid is supplied to ensure even incubation and efficiency

supplied with mains power pack & world universal plug options as standard - ready to go!

Specification & Size

- Power supply – Adaptor – 100-240v AC @ 360 mA
- Power supply – Incubator 12 Volts DC @ 1.8 Amps
- Temperature Control – MX Darlington switched solid state
- Temperature – Factory set to 30°C +/- 0.5
- Capacity – From 1 to 8 Slides
- External case size- (footprint) 22 x 13 x 15(H) cm
- Total Weight – Inc cables & adaptor 1.1 Kg
- Guarantee – 2 Years
